Pure Oakland Water Board of Directors,

This past summer interning with the Clinton River Watershed Council was an amazing experience where I was able to gain knowledge as well as hands on experience. My internship allowed me to gain field experience, help with educational programs as well as cleanups which raised public awareness about our watershed. I am extremely grateful that all of the tasks and activities that I participated in during my time with the CRWC, especially those related to the type of work that I would like to pursue in my future. As an Environmental Science major at Oakland University, I find myself in class today already having prior knowledge of the material being taught, such as stream ecology, due to the knowledge I gained during my summer internship. I want to thank everyone who was able to make my summer internship possible; it was a summer full of incredible experiences, enjoyable times, and making meaningful connections.

Thank You!

Melissa Golembieski
